

Hotel Interiors

by

NLA

Our History

Art and functionality in a cohesive relationship

In 1989, NLA – Nuno Leónidas Architects established a dedicated interior design structure in response to its extensive hotel project commissions. This activity led, in 1997, to the creation of NL Decoração, an independent interior design firm operating in close alignment with the architectural practice.

As part of a strategic marketing repositioning, NL Decoração was later reintegrated into NLA as a dedicated interior design department, maintaining its full operational structure, with Teresa Leónidas assuming a non-executive consultancy role.

This integration strengthens the synergy between architecture and interior design, enabling a specialised multidisciplinary team to deliver a cohesive and highly controlled project approach, from concept to execution, supported by BIM methodologies and advanced design tools.

Our Evolution

A new generation of creativity strengthening and expanding our Interior Design department

From sketch ...To reality

At NLA, our Interior Department understands the cost of every detail. So, **we commit** to detail our proposals to reach your **dreams** in a way that your projects will **endure**

Art

At NLA, artistic sensibility is integrated through careful observation and intelligent space planning. Art enhances atmosphere, identity and visual interest, always in balance with the architecture.

Design

NLA projects balance comfort, elegance, efficiency and safety. Technical expertise is combined with aesthetic clarity to deliver functional and refined design solutions.

History & Integration

With decades of experience, NLA designs functional and welcoming spaces that respect context and architectural intent, ensuring a natural integration between interior and architecture.

Sustainability & Materiality

Our mission is to reduce the environmental impact in our projects, opting whenever possible to use sustainable materials

Hotels & Leisure

Over 50 accomplished projects

Over the last **40 years**, we've developed expertise in this market niche, realizing that capital investments are turning tourism and leisure into a significant growth market. Today, we fully understand and meet the needs of hotel owners and operators, advising them on the best way to advance their programs. Experience, quality, innovative design, and budget control are key to all our projects, some of which are developed with international design teams. Business hotel clients seek comfort, convenience, and excellent communications, while leisure travelers want a unique, unforgettable experience. Hotels must be designed to make guests feel at home even when working. Designers should capture each location's atmosphere and character, incorporating them into the design. Each operator has unique needs, corporate image, and business style, making each project a distinct challenge.

Disclaimer: Brands that have worked with NLA in Architecture and / or Interior Design projects.

The background features a dark wood grain on the left and right sides. The central area is filled with a complex, wavy pattern of thin, dark lines that create a sense of depth and movement. Two vertical rectangular cutouts reveal a lighter, textured surface behind the pattern. A white, irregular geometric shape is overlaid on the right side of the image, framing the text.

BIM

Building the Future with Precision

At NLA, we've embraced Building Information Modeling (BIM) as the cornerstone of our architectural practice. Our commitment to BIM stems from our unwavering pursuit of precision and innovation. BIM enables us to create digital representations of our projects, facilitating efficient design, collaboration, and construction. With an in-house team of architects and BIM specialists, we consistently raise the bar, achieving Level of Development (LOD) between 200 and 300 using Autodesk Revit. This methodology ensures optimal inter-operability and productivity across multidisciplinary teams. We employ Navisworks for BIM models' coordination and continually integrate tools like Civil 3D and Dynamo. Our use of Autodesk Construction Cloud DOCS empowers our clients to monitor the development of models in real time, fostering seamless collaboration even across international borders. BIM is not just a technology; it's a strategic commitment that shapes our architectural future.

Quality

ISO 9001-Certified Excellence

Quality serves as the unwavering bedrock of NLA and NLDEC. ISO 9001 certification guarantees excellence at every stage of our architectural journey. Our seasoned, multidisciplinary team, equipped with vast experience and expertise, meticulously adheres to stringent timelines and precise cost control measures. Quality is not merely a standard; it constitutes the very core of our strategic orientation. This commitment extends from our visionary leadership to every valued collaborator and partner, ensuring that our clients unfailingly receive the highest quality across every facet of our architectural practice. The result is the creation of spaces that consistently exceed industry norms, setting new benchmarks for those who engage with our work. Our dedication to quality is a testament to our ongoing pursuit of architectural excellence, one that continues to redefine the boundaries of design and sustainability, shaping a harmonious and sustainable future for all.
